ShapeShift Exchanges

33.59200708 BTC

The ICO raised 14,000 BTC

The promise

Lisk aspires to become the go-to blockchain for consumers and enterprises to build dApps on

Instead of dApps they use the terminology 'blockchain applications'

What make it special?

Consensus, flexibility, codebase

Key highlights

DPoS consensus

101 delegates

~10 sec/block

Lisk is inflationary at a decreasing rate

2016: 5 LSK per block for the first year (15% inflation, total 115M lisk)

2017: 4 LSK per block for the second (10%, total 127M lisk)

2018: 3 LSK per block for the third (7%, total 136M lisk)

2019: 2 LSK per block for the fourth (4%, total 142M lisk)

2020: 1 LSK per block for the fifth (2.1%, total 145M lisk)

After year 5, this will remain 1 LSK per block every 10 seconds. hence each year 3,000,000 lisk will be mined

2030: 1 LSK per block (1.7% inflation, total 175M lisk)

2040: 1 LSK per block (1.48% inflation, total 205M lisk)

2018 for Lisk

The Lisk team struggled with development during the first two quarters of 2017, but things are now moving at a good pace

2018 should see Lisk realize some of its promised potential

Roadmap includes sidechain implementation making dApps on Lisk a reality

Forks and why Lisk is good for you
